**NEMUS** **DIAGNOSTIC TECHNOLOGY FOR THE MIND**

We now introduce the NeMus system developed to record the electromyographic signal with the highest of accuracy. The quality of signal, the novelty of technical solutions, the software's ease of use and the possibility of expanding its features make the NeMus system state of the art in the field of electrodiagnostic instrumentation.

Thanks to most advanced hardware components integration technology, NeMus offers a remarkably compact design in a basic configuration, including: - 2 Channels EMG - Sampling rate 24 bits per channel - 32 bit Audio output - Dual stimulation - Stimulation frequency range up to 500 Hz - Automatic removal of the stimulation artifact - Bandwidth up to 16 KHz - Digital elimination of main power Interferences - High value of CMRR, IMRR>130dB
